described on its first publication in 1967 as a scholarly account of australian  
music that is also entertaining social history roger covell s austrlaia s music  
themes of a new society has become a classic of australian music history for  
its beautifully written explorations of almost two hundred years of music  
making across classical indigenous and anglo celtic traditions this revised  
edition including more than sixty musical examples is supplemented by a new  
postscript written by the author

politics society and the media is the first comprehensive political sociology of  
the media to be published in canada paul nesbitt larking draws upon a range  
of disciplines including cultural and media studies political economy social  
theory and political science to provide an analysis of the relationship between  
power and representation in canada the framework for the book presents a  
model of the mutual interaction between politics and the media attention is  
focused in the early chapters on how cultural ideological economic and  
governmental forces shape and condition the production of media in canada  
chapters on the work of innis grant mcluhan and their postmodern successors  
place the evolution of mcluhan s theoretical argument that the medium is the  
message at the heart of the book canadian identity and how to understand  
canadian media politically is the subject of a chapter on textual analysis two  
extensive chapters follow on the media s influence and effects on politics in  
addition to standard topics on politics and the media this new edition offers  
much more an examination of the media on the politics of gender and  
aboriginal peoples the micro politics of the media workplace and an  
exploration of important media related considerations throughout reference is  
made to relevant and compelling issues placed within the context of media  
theory

everyone can benefit from having some understanding of environmental  
science and the chemistry underlying issues such as global warming ozone  
depletion energy sources air pollution water pollution and waste disposal  
environmental chemistry in society second edition presents environmental  
science to the non science student specifically focusing on environmental  
chemistry yet requiring no background in chemistry this book is a self  
contained text offering all the information necessary for readers to understand

the topics discussed it provides a foundation in science chemistry and toxicology including the laws of thermodynamics chemical bonding and environmental toxins this information then allows readers to delve into environmental topics such as energy in society air quality global atmospheric concerns water quality and solid waste management the arrangement of the book allows instructors flexibility in how they present the material with the crucial topics being covered first this second edition had been updated throughout and contains the following revisions addition of a glossary of important terms extensive revision of the discussion questions at the end of each chapter to require more critical thinking skills updates to the environmental data the division of the foundational chapter on chemistry into two chapters so each one is more palatable coverage of fracking the fukushima nuclear disaster and the 2010 gulf oil spill the book provides a qualitative approach presenting the chemistry of the environment in such a way that students who have little or no science background can gain understanding and appreciation of this important subject
